***Claim Objections***

It is initially noted that the preliminary amendments of March 28, 2002 and May 8, 2002 have been received and entered. However it is noted that the cancellation of claims 1-33 have left dependent claims 34-37 indefinite as being dependent upon cancelled claims. Due to the indefinite nature of claims 34-37 they have not been considered for purposes of this restriction requirement. It is suggested that these claims be canceled or put into proper form in applicant's response. It is also noted that the newly presented claims have been misnumbered. In accordance with 37 CFR 1.126 the newly presented claims should be renumbered starting with claim 38 (i.e. previous claim 34 should be renumbered claim 38, previous claim 35 should be renumbered claim 39, etc.) For purposes of this restriction requirement the claims will be referred to by the suggested claim renumbering. It is suggested that these claims be properly numbered in applicant's response.

Correction is required.

***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Art Unit: 2853

Group I, claims 38-91, drawn to a printhead.

Group II, claims 92-98, drawn to a method for producing a joint.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the printhead is excluded from the method, and more specifically the thermal barrier element of the printhead, is not included in the method of group II.

A telephone call was made to applicant's representative Mr. Randall Bateman on June 17, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
